ACADEMIC PROJECT UNDERTAKEN:

Project Name: Cross Cloud Data Migration System.

Project Description: Cross-cloud data migration is one of the prevailing challenges faced by mobile users, which is an essential process when users change their mobile phones to a different provider. It is often very difficult for users to backup all data from the original cloud servers to their mobile phones in order to further upload the downloaded data to the new cloud provider. To solve this problem, the proposed scheme helps to develop trust between different cloud providers and lays a foundation for the realization of cross-cloud data migration.

ADDITIONAL SKILLS:

- Exceptional verbal and written communication.
